DAR Set by KEGG terms

CELL_TYPE
SEX
PATTERN

Oocyte meiosis
Regulation of actin cytoskeleton
Focal adhesion
Pancreatic cancer
Endometrial cancer
Non−small cell lung cancer
Adipocytokine signaling pathway
Neurotrophin signaling pathway
Axon guidance
Toxoplasmosis
Apoptosis
Terpenoid backbone biosynthesis
Intestinal immune network for IgA production
Aldosterone−regulated sodium reabsorption
RNA degradation
Colorectal cancer
Type II diabetes mellitus
Ribosome biogenesis in eukaryotes
mTOR signaling pathway
Arrhythmogenic right ventricular cardiomyopathy
Systemic lupus erythematosus
Arginine and proline metabolism
Pyruvate metabolism
