DEG Set by KEGG terms

		*	*			Calcium signaling pathway
			*			Epstein−Barr virus infection
					*	Fc gamma R−mediated phagocytosis
					*	Cytoskeleton in muscle cells
	*					ABC transporters
				*		Huntington disease
				*		Amyotrophic lateral sclerosis
			*			Glycerolipid metabolism
	*					Nicotinate and nicotinamide metabolism
			*	*		Cellular senescence
			*			Proteasome
		*				Rap1 signaling pathway
	*					Spliceosome
					*	Chronic myeloid leukemia
