# DEG Set by KEGG terms

CELL_TYPE
SEX

| | | | | | | |
|---|---|---|---|---|---|---|
| | | * | * | | | ABC transporters |
| | | * | * | | | Glycerolipid metabolism |
| * | | | | | | Epstein−Barr virus infection |
| | | | * | | | Apoptosis |
| | | | | * | | Pertussis |
| | | | * | * | | Cellular senescence |
| | | | | * | | C−type lectin receptor signaling pathway |
| | | | * | * | | Chronic myeloid leukemia |
| | | | | * | | Fc gamma R−mediated phagocytosis |
| | | | | * | | cAMP signaling pathway |
| | | | | | * | Rap1 signaling pathway |
| | | | * | | | Hepatocellular carcinoma |
| | | | * | | | PD−L1 expression and PD−1 checkpoint pathway in cancer |
| | | | * | | | Small cell lung cancer |
| | | | * | * | | B cell receptor signaling pathway |
| * | | | | | | Proteasome |
| | | | * | | | Spliceosome |
| | | | * | | | Amyotrophic lateral sclerosis |
| | | | * | * | | Nicotinate and nicotinamide metabolism |
| | | | * | | | Huntington disease |
| | | | * | | | Oxidative phosphorylation |
| * | | | | | | Calcium signaling pathway |
| | | | | * | * | Cytoskeleton in muscle cells |
| | | | | * | | Adipocytokine signaling pathway |
