DEG Set by KEGG terms

CELL_TYPE
SEX

Nicotinate and nicotinamide metabolism				*	*	
Oxidative phosphorylation				*		
Phagosome				*		
Huntington disease				*		
Parkinson disease				*		
Amyotrophic lateral sclerosis				*		
Pathways of neurodegeneration				*		
Calcium signaling pathway	*					
Cytoskeleton in muscle cells					*	*
Adipocytokine signaling pathway					*	
Proteasome	*					
Rap1 signaling pathway						*
cAMP signaling pathway					*	
B cell receptor signaling pathway				*	*	
T cell receptor signaling pathway				*		
Toll−like receptor signaling pathway				*		
FoxO signaling pathway				*		
TNF signaling pathway				*		
Apoptosis				*		
Cellular senescence				*	*	
Fc gamma R−mediated phagocytosis					*
